_Profile

I am a fine arts graduate with experience in the contemporary art and film production field. Through working in both fields, I earned detail-oriented behavior with demanding crisis management and rigid time management skills. Although my work was time-consuming, I am also pursuing my career as an artist by keeping on developing my personal projects. In my project, my strong interest in technology is always foreshadowed. Inevitably, I decided to make it a part of my main practice. Therefore, I set my course to become a software developer as it makes all sense in terms of job, stability, financial and long-term self-improvement.

_Projects

- * Rock, Paper, Scissors [Demo](#)
A game on web using JavaScript
- * UncleThong Comic Project [Demo](#)
Web comic using CSS Animation
